Please Provide any other suggestions or any other topics you wish to suggest for a future talk/ workshop

It was an amazing experience for me to learn about break systems,oil change,minifixing & break shoe fighting. Please arrange 2-3 day full workshop car essentials also.

The 'How to fix a puncture' problem would also have been helpful as it is common problem and costs more than fixing brakes.

Good exposure to handelling tools and scoter. Can arrange similar session for cars(four-wheelers) to deal with common issues faced (stepheny).

Good exposure to common tools. Good introduction to common scooter issues.

Good exposure to garage tools & vehicle inside, Basic are in time of emergency.More tools learning in next wave.

Looking forward to a design Workshop.

You can have a formal introduction of all participants. At the start. May be also give a short sample of wood great experience. Loved learning.

Very well explained the concepts & very hands on training.will help us to do quick fix. safety was stressed on at all times. Inquistive participant helped me to learn from yellow participants well equipped hacker space.highly recommended.
